# REVV G2

## G Series Pedal

- 1. Input** Guitar in.
- 2. Output** Out to amplifier
- 3. Power** See requirements below for safe operation.
- 4. Bass** Adjust low end level.
- 5. Middle** Adjust mid level.
- 6. Volume** Adjust output level.
- 7. Drive** Engage (up and down) clipping, or disengage (middle).
- 8. Treble** Adjust brightness level.
- 9. Gain** Adjust saturation level.
- 10. On/Off Switch** Engage or disengage pedal.

### The Power Requirements.

Recommended Voltage: Power is 9 volts and 14mA. Isolated Center Negative Tip External Supply Only.

## Understanding the G-Series

G-Series pedals are all-analog sonic recreations of Revv's flagship Generator 120 amplifier channels. As such, they should be treated as preamps, or "amp in a box" pedals. They can be played in front of a clean amp, run directly into a power amp, or used in hybrid setups with modelers & impulse responses. G2 is based on the Green channel: A Nashville favorite for everything from dynamic edge of breakup to singing cranked vintage amp tones.

## Getting Started

Power only via isolated 9v center negative power supply. Start with Volume at zero & all other knobs at noon. Engage G2 & raise Volume to a comfortable level. Consider how you would like to use the pedal. While G2 is based on the Green crunch channel of Revv's amplifiers & can be dialed as your primary gain sound, it has a broad range of drive levels & EQ settings available. This makes it a great solo boost, & also well-suited to stacking with other pedals.

## Drive Voices

G2 has 3 Drive voices controlled by the center toggle switch. While they can be broadly thought of as controlling the amount of distortion (Off = least, Blue = medium, Red = most), these 3 voices substantially alter the performance of the pedal. We find it best to find your favorite Drive setting for your use case (note the difference in compression between modes), then tweak the rest of the controls to taste.

## Warranty

Please fill out the form on the website below within the next 30 days to claim your warranty. Revv Amplification will repair or replace: defective workmanship or materials at its discretion on all new Revv Amplification products purchased directly or through authorized dealers for one year from the day of purchase. This warranty does not cover shipping costs, product appearance, or damages caused by accident, abuse, alteration, or misuse. No other warranty is expressed or implied. [WWW.REVVAMPLIFICATION.COM/WARRANTY](http://WWW.REVVAMPLIFICATION.COM/WARRANTY)

### 1. Always On

### 2. Mild Breakup

### 3. Crunch

### 4. Solo

**Note:** that these are starting points - adjust to taste based on your amp, guitar, and playing style.
